

# Front End Developer (Angular)

**Location - Belfast**

**Salary - TBC**

**Reports To - Front end leader**

Lightyear is an award winning 5 Star Rated, FinTech scaleup. Based at the Catalyst Innovation Centre in Belfast, within 3 short years, we have delivered a global platform and global team with customers in 17 different countries.

As we continue to accelerate our growth, we are looking for a Front end developer to join our rapidly expanding development team in our new 5000sq ft state of the art headquarters.

Lightyear operates its own unique approach to Agile Scrum methodology, in a super fast paced start-up environment that prides itself on its collaborative and innovative approaches to software product development and rapid delivery of product features and enhancements.

You will work directly with the Front end leader, Chief Technology officer and the extended development team to build upon the Lightyear platform and deliver customer features within the world's leading procurement to pay cloud platform, helping SME's across the world redefine their procurement and payables processes.

You will be key in shaping, building and delivering our new products on both Desktop and Mobile. Working on the front end of our web products you will be key to the success of our product landscape. With a focus on realising front end designs into a technical landscape you will ensure that what you produce is always to the highest quality. You will be passionate about UX/UI and web/digital development, what can be achieved and what will make our customers happy. As part of the Lightyear team you will get the opportunity to embrace the latest technologies and approaches from a supportive and collaborative local environment.

This is a role that would suit someone who has a minimum of two years experience building web based products and who wants to take their career to the next level.

## Essential Criteria

In this role you must possess or be able to demonstrate

- 2 years experience working with and developing consumer facing web applications
- Experience with HTML, SASS, Javascript/Typescript and Angular
- Experience of Source Control (GIT)
- Knowledge of web standards and protocols (HTTP, REST, JSON, CORS)
- A feel for elegant UI/UX design
- Working knowledge of Agile methodologies and practices
- Experience working as part of a collaborative tech team
- Drive and ambition to continuously learn

- A passion for product, quality and customers
- A self-starter who takes ownership of their work and delivers to expectations

#### Desirable Criteria

The following skills and experience would be advantageous

- Mobile platform front-end development (iOS, Android, Ionic)
- Experience with Angular Material
- Exposure to unit testing with Karma/Jasmine
- Working knowledge of responsive design
- Experience of working in a StartUp and has a passion for fast paced environments
