Front End Developer

Location - Belfast

Salary - £30K to 35K Reports To - Chief Technology Officer

Lightyear are a FinTech company based in Belfast with a truly global scope. Developing best in class SaaS applications for the cloud, we are looking for an experience Front End Developer to join their Digital Development team.

Lightyear is a fast paced environment that prides itself on its collaborative and innovative approaches to software product development. Harnessing the best of cloud technologies, DevOps/Agile methodologies and a Tech-First mindset, Lightyear is a unique proposition within the Belfast tech space. We don't just talk about about fearless, best in class development. We actually do it.

Working directly with the CTO the Front End Developer will be key in shaping, building and delivering our products. Working on the front end of our web products you will be key to the success of our product landscape. With a focus on realising front end designs into a technical landscape you will ensure that what you produce is always to the highest quality. You will be passionate about web development, what can be achieved and what will make our customers happy. As part of the Lightyear team you will get the opportunity to embrace the latest technologies and approaches from a supportive and collaborative local environment. This is a role that would suit someone who has three to four years experience building web based products and who wants to take their career to the next level.

Essential Criteria

In this role you must possess or be able to demonstrate

• 3 to 4 years experience working with and developing web applications

• Angular

• Typescript

• HTML, CSS and JavaScript Frameworks

• CSS pre-processing platforms, such as LESS and SASS

• Experience in taking design templates to a technical reality

• Confidence and exposure to a SaaS product based environment

• Working knowledge of Agile methodologies and practices

• Source control using Git

• Experience working as part of a collaborative tech team

• A strong communicator (written and verbal)

• A self-starter who takes ownership of their work and delivers to expectations

Desirable Criteria

The following skills and experience would be advantageous

• Amazon Web Services

• Experience of the Azure DevOps or similar CI environment

• Mobile development using Ionic or related technologies

• UI/UX design experience

• Although primarily a front end role any knowledge or experience of backend development in a Java environment would be advantageous
