

Job Details

Position: Java Developer

Reporting To - Chief Technology Officer

Location - Belfast, United Kingdom

Salary - £30k - 35k depending on experience

Lightyear are an award winning FinTech scaleup based in Belfast with a global scope. Developing best in class SaaS applications for the cloud, we are looking for a Java Developer/Technologist to join our growing Digital Development team.

Lightyear is a fast paced start-up environment that prides itself on its collaborative and innovative approaches to software product development. Harnessing the best of cloud technologies, DevOps/Agile methodologies and a Tech-First mindset, Lightyear is a unique proposition within the Belfast tech space.

Working directly with the CTO the Java Developer will help shape, build and influence our new products. This is a great opportunity to understand the existing technical landscape while also shaping the future. The role comes with a lot of autonomy and ownership and you will have the opportunity to own areas of the Lightyear product. You will be passionate about software development, what can be achieved and what will make our customers happy. As part of the Lightyear team you will get the opportunity to embrace the latest technologies and approaches from a supportive and collaborative local environment. This is a role that would suit someone who has three to seven years experience building web based products on the Java stack and who wants to take their career to the next level.

Essential Criteria

In this role you must possess or be able to demonstrate:

- At least 3 years experience working of developing web applications using Java technologies
- Experience of the Spring Framework
- Experience with JSON services
- Application Servers like Apache/Tomcat,
- Confidence and experience in a web/cloud software product based environment
- Experience of working with SQL databases
- Experience of Linux and Windows operating systems
- Experience of source control using Git
- Experience working as part of a collaborative tech team
- A strong communicator (written and verbal)
- Drive and ambition to continuously learn
- A self-starter who takes ownership of their work and delivers to expectations

Desirable Criteria

The following skills and experience would be advantageous:

- The Amazon Web Services ecosystem
- PostgreSQL
- Azure DevOps

And, while primarily a back end role, any experience or knowledge of any of the following frontend technologies would be an advantage:

Angular 7
Typescript
HTML, SCSS, Javascript
Ionic 4
UI/UX skills
