

## **Product Manager**

### **The Organisation**

Lightyear is an award winning 5 Star Rated, FinTech scaleup. Based at the Catalyst Innovation Centre in Belfast, within 3 short years, we have delivered a global platform and global team with customers in 17 different countries. Lightyear's AP product automates data entry and streamlines the Accounts Payable process for businesses and groups of all sizes. Our primary target verticals are in the Accountancy/Bookkeeping and Retail/Hospitality sectors however our software is ideal for the Accounts Payable function of any mid tier business so you will not be restricted by industry type.

We don't fuss about titles and the focus is very much on being part of the team. We want to employ people with great ideas and who aren't afraid to share them.

We have big plans and we need someone to be part of them!

### **About the Role**

As we continue to accelerate our growth, we are looking for an experienced Product Manager to join our rapidly expanding development team in our new 5000sq ft state of the art headquarters. You will work directly with the CEO & founder, Chief Technology officer and the extended development team to build upon the Lightyear platform and define and own delivery of the worlds leading procure to pay cloud platform, helping SME's across the world redefine their procurement and payables processes.

Lightyear operates its own unique approach to Agile Scrum methodology, in a super fast paced start-up environment that prides itself on its collaborative and innovative approaches to software product development and rapid delivery of product features and enhancements.

This is a role that would suit someone who has three to seven years experience product managing software as a service product in fast paced environments and who wants to take their career to the next level. We are seeking someone highly passionate who wants to build out a high performing product management team around them as the company grows. This is not a role for the faint hearted and will require a highly committed approach to succeed.

### **Required Skills & Experience:**

In this role you must possess or be able to demonstrate

- 3 to 4 years product management experience in a fast paced environment.

- Agile Scrum experience.
- Basic Programming framework knowledge.
- Working knowledge of Agile methodologies and practices
- Experience working as part of a collaborative tech team
- Drive and ambition to continuously learn
- A passion for product, quality and customers
- A self-starter who takes ownership of their work and delivers to expectations

**Job Types:** Full-time, Contract, Permanent

**Salary:** Upon Request
